Ordering Terms & Conditions

Placement of Order – 50% Deposit

50% deposit due upon placement of your order for your SCF XJ13 body-chassis unit. These funds are committed to the fabrication of your unit for materials and labour. As a result, this larger deposit is not immediately refundable. However, if you must cancel your order after fabrication has commenced, your deposit will be returned once another buyer takes over your order. It is the policy of The Sports Car Factory to offer the body-chassis unit from a cancelled order to the next pending customer whose body-chassis unit fabrication has not yet begun.

However, where special configurations have been ordered and already implemented on a cancelled body-chassis unit order, the unit may need to be discounted or reworked to attract another purchaser. As a result the customer who cancelled the order will be responsible for the difference.

Completion - Final Payment

Balance due upon completion of your body-chassis unit. Payment in full must be made prior to the release of your SCF XJ13 body-chassis unit for collection by the appointed Freight forwarder.
